Family Medicine is comprehensive health care for children and adults of all ages and genders, encompassing each organ system and every disease entity. These specially-trained physicians are known as family practitioners.

Internal Medicine is long-term, comprehensive care focused on managing both common and complex illnesses of adolescents (typically 18+), adults and the elderly. The physicians specializing in internal medicine are known as internists.

OB/GYN

Primary Care Practices Accepting New Patients

(continued)

Obstetrics/Gynecology is the specialty of medical and surgical care of women with particular expertise in pregnancy, childbirth, and disorders of the reproductive system. This includes preventative care, prenatal care, detection of sexually transmitted diseases, Pap test screening, and family planning. These specially-trained physicians are known as obstetricians/gynecologists.
